beth saw a young man coming she got around behind the syringa bush and hid until he passed by. A game of cross-purposes seemed finally to be in operation between mother and daughter.

great many years opposed a move that had in the end proved to be in every way to his advantage. He became con-

way to his advantage. He became conscious of a little glow toward his wife. He turned to Elizabeth:

"Are you sorry we ain't living out here now, Elizabeth?" he asked in a siow, humorous tone.

Elizabeth thought a good while before she answered. "I don't think I am. I like it in town better." She stopped and thought things over in her careful way. "At least I will if mamma doesn't give me that party." she said.
"Is your ma going to give you a party?" aswed Mr. Shanklin in a troubled voice.

"She says she is," answered Elizabeth with more trouble in hers.

she says she is, answered Elizabeth with more trouble in hers.

If Elizabeth had surprised her mother somewhat that year, she had surprised her father still more. She surprised him most of all when she now said further, "But I don't think I'll go to it."

The next morning Mr. Shanklin became further acquainted with the "mixup." He never bothered to get to his office very early, but sat on the back porch and smoked or whittled for a time. Mrs. Shanklin and Elizabeth were usually in the dining-room at that hour, rubbing the silver or counting the spoons and forks, and they could talk out the window to him. Today they seemed to be talking to themselves on the inside, somewhat to his ex-

MRS. SHANKLIN'S AMBITIONS.

BY R. E. YOUNG.

DWARD SHANKLIN sat in his kitchen door and looked moodily at the chickens cluttering and ackning below him. He and his wife were disagreeing, and he had reached that age in life where it upsets a must be disagree with his wife. He leaned over to the pan of empty pods beside him, picked out a handful and slung them far heyond the quarrelsome child below. The proof the fact was a construction of the state of the part of empty pods beside him, picked out a handful and slung them far heyond the quarrelsome child below. The proof the quarrelsome child below the heart of the state of the storm gathering. Through the class of the storm gathering. Through the seek storm gathering to the

tracted still more—"and we got to go," she said.

After dinner was over Mr. Shanklin with the broad lay of the back yard! In the bearing at the like with the late ovening the back yard! In the bearing at the back yard! In the

the two darkis, who were already installed before the cornbread and shoulder with beaming centent.

"Just to be satisfied like that!" said Mary Shanklin to herself. "Well, what we have out here is just about enough to satisfy people like that." She went across the porch and into the sitting room to lie down. "Cows and pigs—milk and cream—hog killing time and harvest"—the words went scurrying through her head as she passed her husband—"butter and eggs, swill and fodder." Her head was in such a whirl she could hardly reach the sofa. Later on she was dimly conscious that someone came in and closed the shutters and put a wet towel on her head. It was not Elizabeth. Then she slept. She awoke with a sensation of having

A Policy with the good old Home Fire is the best protection "wideawake" people can have.

OF UTAH.

Both Phones 500. 26 South Main.

She tried to neglect nothing that would be of any advantage. She got Elizabeth some new dresses, and she kept bet out on the front porch a great deal. It was her idea to have Elizabeth go to the front gate and hang over it in a careless sort of way about 6 o'clock evenings, this being the hour at which the academy boys and other Penangton young men went home to supper. Not a great deal was accomplished in this way, however, because as soon as Elizabeth saw a young man coming she got. Pelvic Diseases of Men are CURED BY DR. COOK after complete

Pelvic Diseases of Men are CURED BY DR. COOK after complete failures are made by other specialists.

The success of Dr. Cook in curing all forms of Blood Poison, Skin Diseases, Stricture, Varicocele, Hydrocele, Piles, Fistula, Rupture, Nervous and Sexual Decline, Lost Manhood and Diseases of the Kidneys, Bladder and Prostate, has ranked his name as the Greatest Specialist on the American Continent.

My Scientific Pelvic Methods DO NOT FAIL TO CURE

Blood Poison Stricture Varicocele

Also Piles, Fistula, Rupture, Hydrocele, Nervous and Sexual Decline, Lost Manhood and Diseases of the Skin, Kidneys, Bladder and Prostate.

SPECIAL NOTICE—When I say that I am the only physician in the city, or even in the west, who employs pelvic methods for the cure of the diseases I make a specialty, and that other systems of treatment are inferior and unreliable. I make a statement subject to investigation by any council of physicians, and will agree to forfeit \$5,000.09 to a charitable institution if I fail to give sufficient evidence to substantiate the claim.

VARICOCFIE and is simply veins filled with curdled or stagnant blood similar to varieose veins occuring in any other part of the body. This overflow and elotted accumulation are caused by undue excitement or weakness of the sympathetic or ganglionic nerves that regulate the supply of blood in any organism.

Every man afflicted with varieocele of long standing knows that it has blighted his life and that he has made a great mistake in not having himself cured. The disease not only endangers by complication every organ in the same region, but by sympathetic irritation, destroys the nervous system and renders a decorated water above the recommendation of the system and renders a decorated water above the recommendation of the system and renders a decorated water above the recommendation.

region, but by sympathetic irritation, destroys the nervous system and renders a man a complete wreck physically, mentally and sexually.

My treatment is the result of years of experimentation. There is no operation about my radical cure for varieocele, neither any pain nor detention from business. My procedure consists of absorption, by which means the stagnant blood is transuded into the cellular tissues and finally ejected in the same manner as all other waste matter is thrown off. The ganglionic nerves, the weakness of which cause varieocele, are restored by the administration of a tonic, and a complete cure is possible in every case.

HYDROCELE is one of the frequent chronic discases. It consists of an accumulation of serous fluid and characteristics.

of an accumulation of serous fluid and always involves the entire pelvic system, depriving the organs and the pelvic system of all vitality. Hydrocele is commonly caused by injury to the scrotum, or may result from continued inflammation produced by stricture, piles and any chronic trouble in the pelvic system. No one but a physician who has devoted his attention to this class of diseases is able to distinguish a case of hydrocele from either rupture or varicocele.

The remedy I use to cure hydrocele completely obliterates the tumor at once, and by the use of a preparation for a

and by the use of a preparation for a few days no sign of the disease ever re

putes.

Or hemorrhoids are small vascular tumors, situated at the lower opening of the bowel, or rectum. Among the clief causes may be mentioned constipation, sedentary habits, indigestion and, in fact, any condition that interferes with the process of digestion.

They have a most degrading influence on the general health. In fact, many patents come to me suffering with constitutional disturbances of various kinds, which are reflex conditions produced by Pile Tumors, and after their piles are cured, the other troubles disappear immediately. The rectum is the only organ of the aimmentary canal which receives its nerve supplying it, which in turn irritates the spinal cord, from which the different organs of the body get their nerve supplying it, which in turn irritates the spinal cord, from which the different organs of the body get their nerve supply, In this way irritation of the rectum is transmitted to the various organs of the body through the nervous system.

My treatment and success are the re-

of the rectum is transmitted to the various organs of the body through the nervous system.

My treatment and success are the result of years of experience, and my method is distinctly my own. I cure without cutting, nor do I use ligature or any carboile acid injections, which treatment has ruined many a man. There is absolutely no pain or detention, and when you leave my care you are cured for life.

Properly termed Hermida, is an infection in the region of the peivic system, and is an escape or protrusion of the bowels from the lower part of the abdominal cavity. The tendency of, Rupture is always progressive, and the symptoms are usually so slight as not to warn the afflicted, even though he be in immediate danger. Rupture frequently results in strangulation and death. Trusses should not be continuously worn, as they only agreevate the trouble.

I have a sure, safe method for curing Rupture. Besides being absolutely reliable, it is painless and harmless. It makes no difference how many times you have been treated, I can cure you, and will guarantee entire satisfaction.

IMPORTANT .- I will cure you for less money that you can be treated by any other specialist in the west. You will have to come to me sooner or later in order to be properly cured; why not before you have lost your money in doctoring with cheap or dishonest, unskilled specialists?

CURE OR NO CHARGE-ABSOLUTELY NO CHARGE UNLESS SATISFACTION IS GIVEN. My patients receive a written guarantee to refund every dollarfor service if they do not receive a complete, lifelong cure and entire satisfaction and I have made a deposit of \$500.00 in the bank, to secure any contract that I do not fulfill.

HOW I CURE THE DISEASES INCLUDED IN MY SPECIALTY AFTER SO-CALLED SPECIALISTS EXPERIMENT AND FAIL; MY PRICES FOR TREATING. WHICH ARE THE LOWEST OF ANY RELIABLE SPECIALIST IN THE UNITED STATES.

STRICTURE

And Its Scientific, Certain, Safe Cure

BY DR. COOK'S METHOD OF IRRIGATION AND DIGESTION, WHICH IN-SURES EVERY ONE A SAFE, PAINLESS AND PERMANENT CURE

Stricture is the most frequent and dreadful disease of the Pelvic system, and is not only important because of its painful and harmful effects upon the canal, but is grave by reason of its intimate relation through the sympathetic nervous system with the kidneys, bladder and prostate. Every man affected with stricture for any length of time is bordering on dangerous complications with the kidneys and bladder, and when these vital organs are enroached upon by disease the results are so serious as to forebode more danger than consumption.

The reason why there are so many failures made in treating stricture is because 90 per cent of the physicians who claim to cure the disease employ some method of treating organic stricture when some other condition exists. No doctor can justly claim the ability to cure stricture unless he has devoted years of study and practice to the disease, neither can any one expect to be cured by cutting, dilating, syringing, or the use of soluble bougies, which give only temporary relief and aggravate the disease.

My treatment for stricture is by irrigation, which digests the formation in fibrous particles, after reducing all inflammation so that the passage of water is without pain or difficulty. Immediate relief is received from the course of treatment I administer, and I cure the most severe cases. When I have dismissed a case the canal is sound, healthy and perfectly natural. I will give \$1,000 for a case of simple stricture that I cannot cure.

Sexual Power Restored.

THERE IS NOT A MAN IN EXISTENCE WHO IS SUFFERING FROM SEX. UAL WEAKNESS OR "LOST MANHOOD," IF DECLINE IS FROM UNNATUR-AL CAUSE, THAT I CANNOT REBUILD AND STRENGTHEN, AND AFTER I HAVE CURED A CASE OF THIS KIND THORE WILL NEVER AGAIN BE A SIGN OF WEAKNESS, EXCEPT BROUGHT ON BY IMPRUDENCE.

About three-fourths of the male population from 20 to 60 years of age are troubled with an abnormally weak condition of the organs of procreation, invariably brought on by the youth in his teems or the many excesses to which man is apt to be addicted. Varieocele, involuntary emissions, drains, premature discharge, small organs, weak back are all symptons of rapid decline.

MY CURE is a thorough and scientific course of treatment which acts at once upon the nerve forces, stopping the drain and replacing the worn-out and run-down tissues. It increases the weight in sound, healthy flesh and muscles that give strength and fills the brain and nerves with fresh vitality, building up the entire system and transforming the sufferer into a type of complete manhood.

ENLARGED PROSTATE Results from inflammation caused by irritation, obstructing the urinary canal and rectal passage, producing painful urination and chromic constipation, reduces the enlargement, a normal condition is resumed, and 20 per cent of the cases I treat are permanently cured.

NONEY COMPLAINTS Kidney diseases affect a large norance of their trouble and attribute their unwell condition to some other cause. Male excesses, alcoholic fliquots, severe sickness, which weakens the kidneys, often produce kidney diseases, and the usual symptoms are highly colored urine, with strong odor, sediment in urine, frequent urination, or irregular, chilly and feverish spells, wormout feeling, puffiness under the eyes or swellings.

My long study and extensive practice in the treatment of all ferms of Kidney Diseases have familiarized me to the extent that I have attained a skill which insures successful treatment in all cases that are not incursible. I determine the condition of the kidneys by a scientific analysis of urine, and many severe kidney troubles I have cured by my systematic course of treatment, after being given up as incurable by other physicians, gives me such confidence in my method as to assure every case I accept a permanent cure.

CONSULTATION FREE, CONFIDENTIAL AND INVITED-A personal, thorough and searching examination is desired, though if inconvenient to call, write me a full description of your trouble. Office hours: 9 a. m. to 8 p. m., excepting Sundays, from 10 to 12:30 p. m. Address or call
